HYEJI KIM (Alex)

QA Tester · Manual Testing · Test Automation · Gen AI Evaluation · Seoul, South Korea
kimhj.business@gmail.com · kimhj-alex.github.io/QA-Portfolio · Available for remote roles worldwide

PROFESSIONAL SUMMARY

Detail-oriented QA tester with a natural instinct for identifying usability failures, logic gaps, and broken user flows across web and mobile platforms. Background in education, content creation, and software development provides a cross-disciplinary perspective — able to think like a developer, communicate like a writer, and test like a real user. Building toward ISTQB CTFL and CT-GenAI certification, with a strong foundation in manual testing, exploratory testing, and usability analysis. Recently built a Playwright automation suite from a standing start, and applies the same hands-on scrutiny to Gen AI-assisted work — documented as narrative case studies covering app development, creative writing, and business planning. Fluent in English, Spanish, and Korean.

QA PORTFOLIO HIGHLIGHTS

Independent exploratory testing, test automation, and Gen AI evaluation across real-world platforms and self-built tools. Full portfolio at kimhj-alex.github.io/QA-Portfolio.

Platform Audits · 4 audits, 21 findings · Remote, 2026

– GitHub Usability Audit (4 findings) — undiscovered folder-creation method, missing deployment feedback, a since-resolved Brave browser bug, inadequate DNS setup guidance

– ISTQB Website Audit (5 findings) — a search filter excluding a valid accredited provider, broken language switching (Korean/Spanish didn't translate), an inaccessible accessibility control, a hidden glossary export, a silent quiz failure state

– Shoebox Planner Self-Audit (7 findings) — self-built PWA, checklist/exploratory/cross-device testing across desktop and iPad; undo/redo, save/load, and touch-specific regressions

– Gemini Usability & Reliability Audit (5 findings) — reference-image substitution across a generation thread, a workflow that misrepresented supported input types, fabricated audio in clips labeled "silent," a chat-list sync failure isolated to one device

Shoebox Planner Test Automation · 18 Playwright tests, 4 categories · Remote, 2026

– Built a Playwright suite from zero prior experience with the tool, covering geometry/wall-clamping (7 shape variants), canvas-to-sidebar UI sync, save/reload persistence, and resize-limit behavior

– Automated three findings already documented in the manual self-audit, and surfaced one new, previously untested behavior (no enforced min/max on furniture resize)

– Verified cross-browser (Chromium, WebKit, Firefox); every test assertion grounded in a measured value from the live app, not an assumption

Individual Platform Findings · 8 bug reports, full Jira-style documentation · Remote, 2025–2026

Standalone findings across Instagram, TikTok, Gmail, Squarespace, Etsy, Amazon KDP, YouTube Studio, and Google Calendar — covering silent failures, incomplete disclosures, and missing user feedback across social, publishing, and productivity platforms.

Gen AI Case Studies · 3 narrative evaluations · Remote, 2026

– App Development — The Ellipse Math Shortcut: an AI assistant defaulting to a workaround over correct collision math, and a rotation-gated shortcut recurring across fix attempts, isolated via black-box testing

– Creative Writing — Consistency Across Books: cross-project fact inversion, a correction that fixed a description without its underlying logic, and a manuscript misattribution leading to a fully invented scene

– Business Planning — Confidence vs. Correctness: a settled pricing decision regenerated from scratch, reassurance substituting for a direct answer, correct arithmetic run on the wrong rate card

WORK EXPERIENCE

Indie Creator & Digital Product Designer · Shoebox & Co.

Remote | Sep 2025 – Present

– Designed and launched 100+ surface pattern designs across Spoonflower, Etsy, and Printree

– Created 40+ educational resources for Fig & Fern Classroom (TPT)

– Built and launched Shoebox Planner (room-layout PWA) and Hello Ink (bilingual tattoo-booking service) from scratch using HTML, CSS, and JavaScript, in collaboration with an AI assistant

– Conducted independent QA testing across self-built apps, websites, and self-published books — manual and automated testing, plus hands-on Gen AI output evaluation

– Self-published a fiction catalog via Amazon KDP, co-written with an AI writing collaborator

– Managed end-to-end product lifecycle: concept, design, listing, quality review, and iteration

Grade 3 Homeroom Teacher · Gangnam International School

Seoul | Aug – Sep 2025

– Taught full curriculum in English; managed documentation, parent communication, and scheduling

Spanish Language Teacher · BC Collegiate

Seoul | Aug 2023 – Dec 2024

– Developed original curriculum for Grades 6–9; led event planning and administrative coordination

Administration Specialist · BC Collegiate

Seoul | Jun 2022 – Aug 2023

– Managed bus coordination, attendance, personnel records, and formal document creation

– Translated academic and administrative documents between Korean and English

Founder & Manager · Minari Bakery

El Salvador | Apr 2019 – Jul 2021

– Founded and operated a Korean-style dessert shop; managed all operations, branding, and customer service

EDUCATION & CERTIFICATIONS

ISTQB CTFL (Foundation Level) and CT-GenAI — in progress

B.A. Hispanic Language & Literature — Seoul National University, 2017 · Minor in English

TOEIC 990 / Speaking 200 — 2021

DELE C1 Spanish Proficiency — 2024

Culinary Arts Diploma — Academia Panamericana de Arte Culinario, 2019

SKILLS & TOOLS

Testing: Regression · Smoke · Sanity · Usability · Accessibility · Bug Reporting · Test Case Documentation

Test Automation: Playwright · Cross-browser testing (Chromium, WebKit, Firefox) · Selector strategy · Visual/measurement-based assertions

Gen AI Evaluation: Prompt-level defect isolation · Context-drift & hallucination detection · Cross-session consistency checking

Methodologies: Exploratory Testing · Manual Testing · Black-Box Testing

Tools: Jira (familiar) · GitHub · Firebase · VS Code · Google Workspace

Platforms: Web · Mobile · Tablet · Cross-browser testing

Languages: English · Spanish · Korean

Design: Procreate · Adobe Fresco · PatternDraw · Canva · Affinity Photo
